صورة مع التحية لسعادة رئيس الغرفة التجارية والصناعية

سعادة أمين عام الغرفة التجارية والصناعية

السلام عليكم ورحمة الله وبركاته،

إشارة الى القمة السعودية الأمريكية للبنية التحتية والتي عقدت بتاريخ ١٦ مارس ٢٠٢١م، والذي تم خلالها تسليط الضوء على مشاريع البنية التحتية السعودية في قطاعات الاتصالات وتقنية المعلومات، والسياحة والسفر، والمواصلات والخدمات اللوجستية، وإدارة النفايات والطاقة وذلك بمشاركة أكثر من ٢٠٠ شركة أمريكية.

عليه يسرني إحاطتكم بأن العمل جاري لعقد لقاءات ثنائية افتراضية بين المهتمين من أصحاب الأعمال السعوديين بنظرائهم الأمريكيين، ويمكن للراغبين من مشتركي غرفتكم الموقرة بالمشاركة في أعمال اللقاءات الثنائية التسجيل من خلال ارسال بيانات المشارك والشركة والقطاع باللغة الإنجليزية على البريد الإلكتروني aalmuaibid@csc.org.sa مع تحديد الشركة الأمريكية المراد لقاءها بحسب القائمة المرفقة.

آمل من سعادتكم التكرم بالاطلاع واتخاذ ما ترونه مناسباً. ولمزيد من المعلومات يمكن للمهتمين التواصل مع المدير التنفيذي بإدارة العلاقات الدولية الأستاذ/ عبد الرحمن بن حمد المعبيد على الجوال رقم: (٠٥٥٦٦٦٩٤٧٢).

وتقبلوا أطيب تحياتي وتقديري،

الأمين العام

د. خالد بن عثمان اليحيى

Company Description

PCI Vetrix is a full service provider of Industrial Automation services. We provide planning & design, programming, integration, panel building services. We have served the largest Water/Wastewater utilities in the USA for the past 20 years, as well as the Big 3 Automotive companies.

Haws is a US manufacturer of safety and hydration equipment with locations around the globe.

HEM Paving Equipment manufactures concrete paving equipment and accessories.

Manufacturer of thermal processing equipment with focus on Jet Engine and Industrial Gas Turbines.

EZRA JOEL GROUP is a multi-divisional business organization which includes operations in Agriculture, Renewable Energy, and General services in Africa and the Middle East. We service clients with inadequate storage, processing, handling, or distribution capabilities by building facilities in emerging markets.

Pegasus utility Locating Service Inc. is an underground utility locating company. We specialize in Subsurface utility engineering.

DCJ provides professional management support services in the logistics and material management area.

Established in 1940, Ardrey Trading Company is a US manufacturer and distributor of underground and overhead electric transmission and transformer components, epoxy bushings, and DryKeep power transformer dehydration systems for asset life extension with condition-based monitoring.

HALO provides maritime access control and marine gate systems to ARAMCO, and soon to Bahri/MAWANI Ports. HALO has the latest control.

The International Code Council is a non-governmental organization that develops model building codes and standards through an open, consensus-based process with state and national governments. In addition, we provide a fully integrated set of support products and services that facilitate the adaptation, adoption and implementation of codes worldwide.

Roadways/Highways – new alignments, widenings, resurfacing. Hydraulics and Hydrology – drainage, modeling, permitting, scour analysis. Traffic Engineering/Studies – safety analysis, signals, ITS, Illumination, IAJR. Multi-Modal Facilities – sidewalks, trails, pedestrian bridges. Construction engineering & inspection, Project management, Scheduling, Contract administration, Railroad and transit, Alternative contract delivery.

V3 Companies is a science, engineering and design consulting company with more than 35 years of providing consulting and contracting services. We conduct project work globally. V3 has worked on numerous water supply and roadway projects in countries in the Middle East, Africa, the Americas, Europe, and Asia. V3 includes the design and construction of water supply systems and solar powered pump stations in Haiti, due diligence for school infrastructure in the Republic of Congo. No project is too large or complex. V3 recently was the program engineer for a \$1 billion infrastructure improvement project in the Republic of Congo. V3's flexibility, with multi-lingual specialists who quickly deploy to countries wherein conditions can be adverse and challenging. Our clients rely on V3 within aggressive time frames.

Samuel has over 20 years deep experience in construction and engineering in the Oil and gas, infrastructure, energy, transportation, mining, commerce, waste management, agriculture, technology and innovation in Africa. Samuel is a Fixer.

We are a comprehensive and best-value USA based solution company that provides strategic and flexible solutions to present-day challenges. We offer two integrated and critical solutions, Terrachrome Consulting and Terrachrome Contracting. While Terrachrome Consulting implements through the provision of turn-key fulfillment.

INTERNATIONAL trade and development

TOWER ENGINEERING, INC. (TEI) is widely known as an innovative leader in the supply and installation of permanent design, counterforce, and providing the highest quality products and services makes TEI the unrivaled choice with owners and consultants worldwide.

LJA Engineering is an ENR top 100 Civil Engineering Firm providing the complete spectrum of engineering services with an extension in Houston, Texas.

3D printing is revolutionizing the world in many ways. We focus upon construction of single to four story buildings and structures to save time and money.

Involved in Spare Parts for Heavy Equipment , Construction and Mining Equipment

We design, manufacture and sell Humidification equipment (HVAC Industry) for personal comfort and wellness as well as for product quality and process control.

KCCT is a mid-sized architecture, planning and interior design firm. Since our inception in 1983, we have capitalized on our long legacy of providing quality architecture, planning, interiors, security, sustainability projects, or providing historic preservation services, we pride ourselves on our commitment to occupancy. Our approach to achieving excellence in design has proven successful by many repeat clients and 23 design awards. To date, we have worked with agencies, institutions, and private clients. KCCT has designed projects in 132 countries and over 160 foreign cities. The firm has staffed projects in Korea, Thailand, Philippines, Taiwan, Malaysia, and Israel. Four principals of the firm and five of our architects have managed projects on projects of international design experience.

Low impact Technologies USA (LIT), specialises in the manufacturing of very large thermo plastic composite parabolic mirrors used for Concentrated Solar Multi Effect Distillation (CSMED) technology, that enables the opportunity to distill pure water from virtually any input source, discharge, residential and agricultural effluents and other industrial waste or process water.

Domtec International specializes in building insulated, reinforced concrete domes to the cement, mining, power and fertilizer industries for flat storage or silo structures. Domtec offers the benefits of both structures which provide up to 50% savings in building costs while also of exceeding the most stringent international and country codes including seismic requirements. Our structures will last the life of the plant, have information visit www.DOMTEC.com or view some videos at www.vimeo.com/domtec bdavis@domtec.com

Original Design Manufacture, Additive Manufacturing Capacity

Critical Preparedness, LLC is a full-service emergency and disaster management consulting firm, with an extensive background in utilities, services to municipal, government and private sector clients. We provide Preparedness, Response, Recovery and Mitigation consulting services to resource (CI/KR) sectors as identified by the U.S. Department of Homeland Security (USDHS). Our experiences range from Fortune 500, government, and private sector clients.

Company Description

PhDsoft Technology is the market leader in digital transformation for asset structural integrity, digitizing the inspection, maintenance and evaluation process combining digital twin & IoT and industry 4.0 technologies. PhDsoft provides a comprehensive, agnostic and scalable Predictive Digital Twin that ingest data from human inspections, sensors and robot to integrate real current condition of an asset to be visualized on the 3D model (Digital Twin), evaluate risks and prescribe repairs. C4D® focuses on structures, piping, static equipment, onshore and offshore providing crystal clear awareness of the aging process and associated risks over time. C4D® is a proven solution used by major energy companies (Shell, Mdec, Petrobras), Ports (Port of Houston), other examples of assets: Infrastructure such as bridges, highways, and railroads. Structure in ports such as cranes, maritime such as vessels, renewable energy; wind turbines, LNG, among other assets).

OSIsoft, LLC is a manufacturer of application software for real-time data management, called the PI System.

distributor of electric and electronic products

We provide cybersecurity, ransomware protection, cloud, managed services, disaster recovery, data center services, call center, solar power LED lighting and telecommunications services, including internet, satellite, voice and TV through over 50 telecommunications carriers as well as other related IT services.

Provider of Artificial Intelligence technology

Sanborn is a 21st century industry leader in geospatial solutions and technology, offering superior services, program management, and customer support. For our clients we provide a national presence, extensive resources, quick responses, and exceptional value. For 150 years we have been a leader in the rapidly growing geospatial industry, with successful projects delivered worldwide.

Founded in 1995, WSC is a privately held global simulation and services company headquartered in the US. WSC's vision is to provide innovative, state-of-the-art, simulation technology products and services that add value in the design, commissioning, and safe and reliable operation of customer power generating or process plant assets. WSC is committed to the simulation marketplace and has invested several million dollars to develop engineering grade technology for simulators. WSC offers a corporate commitment to excellence from a stable, high technology engineering firm. WSC's mission is to meet or exceed customer requirements and expectations by: Providing innovative, state-of-the-art high quality training simulators and simulation products to meet customer's operation, training and safety needs. Maintaining and sustaining the highest quality in our simulation products to support the use of simulation as an integral part of the engineering process in new plant design or plant upgrades. Promoting continuous improvement in our products and services while complying with all applicable regulations and standards.

MI CABLE ASSEMBLIES

Specialized advanced technology firm.

Ai-RGUS is Artificial Intelligence software dedicated to automate the verification of security camera views including checking the health of the surveillance system. Ai-RGUS is a complete solution that relieves you from the burden of ensuring that all the devices of your security camera system are functioning correctly. Ai-RGUS verifies that each aspect of your system is working as intended so you can be sure you have the images you need when you need them the most. It will provide daily reports and send automatic alerts when a view is compromised due to Blur, Tilt, Tamper, Obstruction, Glare, Low light, and Feed down. In addition to the camera view notification and reports, Ai-RGUS will let you know about any failures of the peripheral devices that are an integral part of your surveillance system, such as the recorder, DVR or NVR's and the VMS. You can even get notified if you don't have the amount of days of recordings that you need. Ai-RGUS gives peace of mind that the cameras are regularly monitored and will free personnel for other important tasks. Ai-RGUS success story: Duke University uses Ai-RGUS since 2017 for its 2,000+ cameras. Duke Office of Information Technology shared with us: "We spend on average 5 minutes/day inspecting our 2,000+ cameras thanks to Ai-RGUS".

Bidgely is an AI-powered SaaS Company accelerating a clean energy future by enabling energy companies and consumers to make data-driven energy-related decisions. Powered by our unique patented technology, Bidgely's UtilityAI™ Platform transforms multiple dimensions of customer data into deeply accurate and actionable consumer energy insights. From a Distributed Energy Resources (DER) and Grid Edge perspective, whether it is smart thermostats to EV chargers, solar PVs to TOU rate designs and tariffs; UtilityAI™ energy analytics provide deep visibility into generation, consumption for better peak load shaping and grid planning, and delivers targeted recommendations for new value-added products and services. With roots in Silicon Valley, Bidgely has over 17 energy patents, \$50M+ in funding, retains 30+ data scientists, and brings a passion for AI to utilities serving residential and commercial customers around the world.

CIYIS is an SBA 8(a) certified performance-driven management consulting, engineering & research based professional services firm that utilizes various cutting-edge technologies, best practices, and research & development methodologies in order to solve organizations' most challenging operational, strategic, and technological constraints on the path to organizational excellence. CIYIS provides technology based professional services in areas such as Program Management/Project Management, Supply Chain Management, Cloud Computing, Artificial Intelligence, Enterprise Asset Management, Strategic Planning/Advisory, Enterprise Architecture, Application Development, Cloud Integration with ERP, and Enterprise Governance Risk & Compliance across the private and public sector. From an engineering perspective, CIYIS provides professional services in areas such as Program Management / Project Management, Regulatory Compliance, Architectural Engineering Support, Scientific Based Research & Development, Strategic Advisory / Planning, Feasibility Studies / Condition Assessments, Independent Verification and Validation (IV&V), and Pipeline Integrity / Compliance Services in various engineering subject matters across the private and public sector.

Our vision is to lead the convergence of convenient, customized and secured IoT systems combined with the development of 3D construction projects.

TDG is an award-winning real estate development company providing innovative products and solutions regarding Smart Cities. We design and implement American innovations to provide market leading solutions to the world. Innovative products and services act as ingredients in our urban recipes regarding Renewable Energy, Water, Autonomous Transportation, Sustainable Environments, Healthy Buildings, Indoor Quality and Opening Economies due to the COVID-19 Pandemic around the world. TDG has a business presence in the UAE (Abu Dhabi, Dubai), Saudi Arabia (Jeddah, Riyadh) and Egypt (Cairo). Our work as a member of milestone projects like Expo2020 (UAE), Vision 2030 (KSA), RERA (UAE), Emaar Dubai Creek (UAE), Knowledge Economic City (KSA) and Jeddah Economic City (KSA) have been highly successful. We wish to expand our presence, operations and success in the UAE, KSA and Egypt and know that being part of these upcoming 2021 Trade Missions will be a major contributor to this success. TDG has been part of two previous successful Trade Missions with then Secretary Pritzker to the Middle East and China. TDG was enthusiastic in communicating its participation in these Trade Missions and looks forward to continuing this relationship with these upcoming Trade Missions.

Founded and fueled by science, Leidos is a global leader delivering integrated solutions to help our customers achieve global mission success across every domain. Our 38,000 employees support vital missions for government and commercial customers in the defense, intelligence, civil, and health markets.

We are a client-inspired company who deliver forward-thinking innovative solutions across multiple industries. We work hard to create breakthroughs for our clients, partners, and communities. Our areas of business focus include: o Digital Transformation o Process Automation o Data Management & Analytics and o Consulting Services to enhance capacity planning & optimization and assist decision making across the myriad value-chains.

CNC Software Inc is the creator of Mastercam CAD/CAM Software used for programming machinery.

First Move Cybersecurity Defense The detection of today's multi-pronged and sophisticated cyber threats is one of the biggest challenges to government and commercial information security and stability. Cyber Security Teams require intimate knowledge of threat vectors, visibility into the tactics of each part of a potential threat, insight into the potential for cross-network propagation and detection of zero-day threats on day one – without signatures or updates. With BluVector, our AI- and machine learning-based advanced threat detection and hunting platform delivers capabilities that not only detect on day one but often months before zero-days are publicly acknowledged and recognized. BluVector is a patented, AI-powered, advanced threat detection and hunting platform for enterprise-scale cyber security protection. We provide visibility and detection across the entire MITRE ATT&CK cyber kill chain, detecting anomalous content, behavior and entities - at wire speed, and with industry leading accuracy. BluVector is ready to serve and detect.

Honeywell International Inc. is an American publicly traded, multinational conglomerate headquartered in Charlotte, North Carolina. It primarily operates in four areas of business: aerospace, building technologies, performance materials and technologies (PMT), and safety and productivity solutions (SPS).

Motorolasolutions is market leader in the LMR, MCPTT communication, Artificial Intelligence, Smart Analysis, CCTV monitoring and command and control. MSI presence in Saudi since more than 20 years. We'll know trusted solutions provider in the Saudi Market.

Give people the power to build community and bring the world closer together.

OSI Systems, Inc. is a vertically integrated designer and manufacturer of specialized electronic systems and components for critical applications in homeland security, healthcare, defense, and aerospace. The largest component of our business is our security screening business which is comprised of three divisions, Rapiscan Systems, Rapiscan|AS&E, and S2 Global providing security and inspection systems, turnkey screening operations, and integrated solutions, all supported by a global service and maintenance network. Rapiscan Systems, Inc. is the leading provider of security inspection solutions and superior detection products and capabilities. Rapiscan|AS&E is the cargo security division of OSI Systems, Inc. providing sea ports and border crossings with a broad array of cutting-edge screening systems to expedite checkpoint screening processes. S2 Global, Inc. is a provider of turn-key security screening solutions and has extensive experience providing project management and overall operation, training, assessment, technology, image analysis and maintenance services at ports, land borders, airports and critical infrastructure.
